Office Action Summary

Art Unit: 3753

This action is responsive to the communication filed May 21, 2003 and May 21, 2003.

Claims 1-3, 5-11 are rejected under 35 U.S.C. §102(b) as being anticipated by Bell. Bell shows a distribution manifold 1 having an inlet 1a at the bottom wall, which appears from the drawings to be cylindrical, and a plurality of outlets 3a which extend into the manifold 1 as shown in Figure 2. The inner ends of cylindrical outlets 3a have radii of half their diameter. The four outlets shown are read as two banks of two.

The recitation in claim 1 of "for an air mass flow controller for fuel cells" merely relates to intended use and is given no weight.

Applicant's remarks have been fully considered but are not deemed to be persuasive. As to the recitation of "diffuser", the specification makes no special definition of what a diffuser is but uses the term generally. In the fluid handling art a device which inputs one fluid stream and outputs a plurality of streams is often called a manifold or header. Since that is what the instant invention is, a manifold patent properly anticipates the claim.

As to the first and second axes, the claim language is extremely broad. What does it mean to be "disposed along" an axis? Nothing in the claims require the axes to extend through the mid point of the outlets or precludes the outlets from being

in a straight row. One could easily take one axis through the tops of the outlets 3a, another through the bottoms of the outlets and accurately describe some of the outlets as being "disposed along" either of such axes.

Claim 4 is rejected under 35 U.S.C. §102(b) as being anticipated by Kaminaka et al. Kaminaka et al show a fluid distributor 10 having an inlet 1 and outlets 3, the six outlets disclosed being read as two banks of three. The inlet and outlets are on opposite walls.

As to the axes, the remarks above apply equally here.

THIS ACTION IS MADE FINAL. Applicant is reminded of the extension of time policy as set forth in 37 C.F.R. § 1.136(a).

A SHORTENED STATUTORY PERIOD FOR RESPONSE TO THIS FINAL ACTION IS SET TO EXPIRE THREE MONTHS FROM THE DATE OF THIS ACTION. IN THE EVENT A FIRST RESPONSE IS FILED WITHIN TWO MONTHS OF THE MAILING DATE OF THIS FINAL ACTION AND THE ADVISORY ACTION IS NOT MAILED UNTIL AFTER THE END OF THE THREE-MONTH SHORTENED STATUTORY PERIOD, THEN THE SHORTENED STATUTORY PERIOD WILL EXPIRE ON THE DATE THE ADVISORY ACTION IS MAILED, AND ANY EXTENSION FEE PURSUANT TO 37 C.F.R. § 1.136(a) WILL BE CALCULATED FROM THE MAILING DATE OF THE ADVISORY ACTION. IN NO EVENT WILL THE STATUTORY PERIOD FOR RESPONSE EXPIRE LATER THAN SIX MONTHS FROM THE DATE OF THIS FINAL ACTION.
